Capability Statement

Supply Chain | Logistics | Procurement

OUR SERVICES

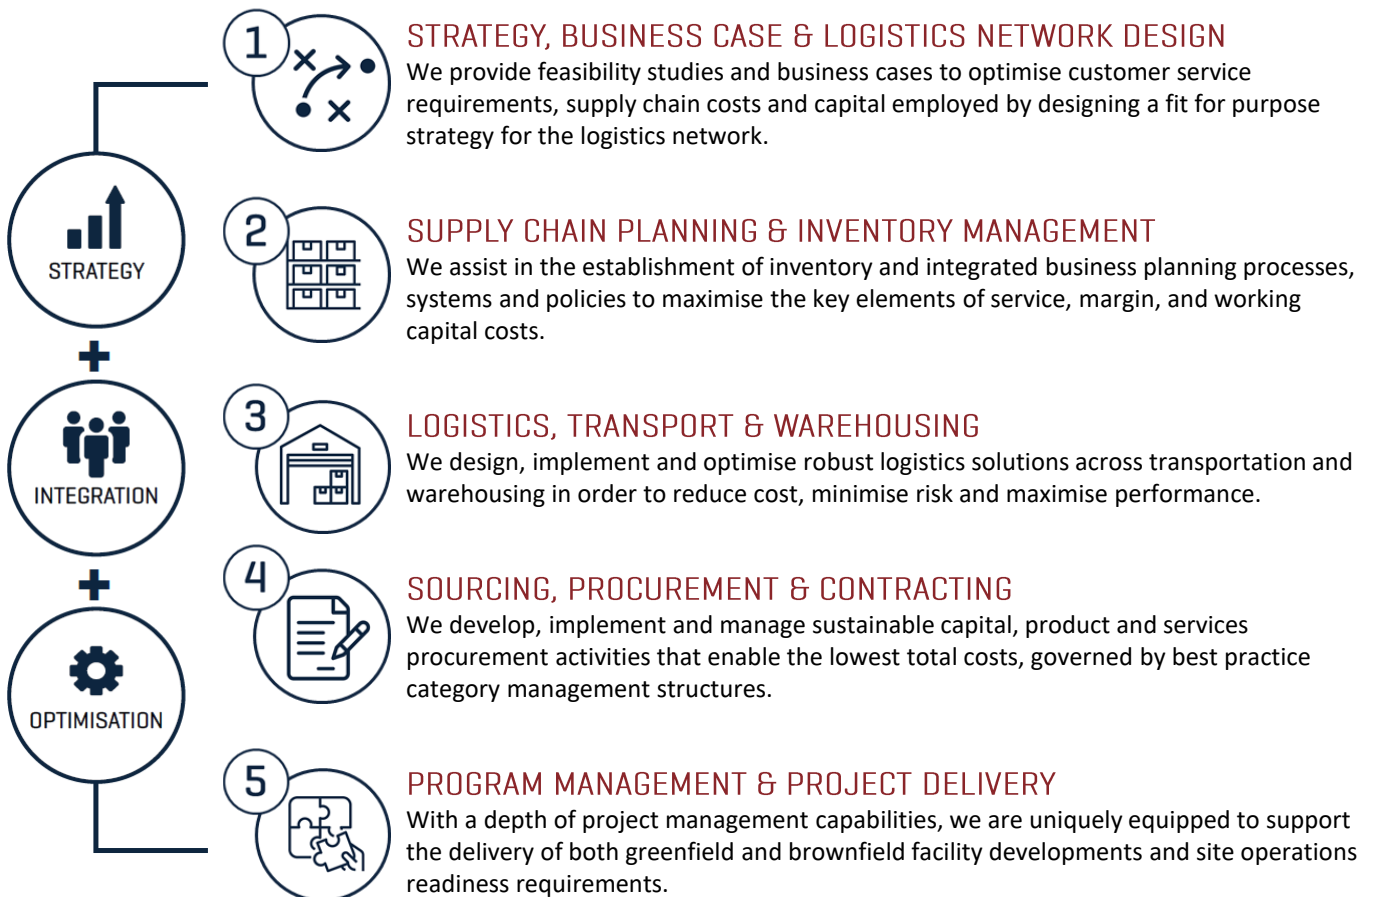

Siecap is a project management and advisory firm specialising in providing a full range of corporate and operational services across the asset and investment lifecycle assisting our clients to optimise cost, increase performance and manage risk.

Siecap Supply Chain is one of the divisions of the wider Siecap Group that specialises in providing customised solutions from concept and strategy through to implementation and operational improvement.

OUR OFFERING

We have in-depth supply chain, logistics and procurement capability and a solid understanding of the strategic and operational implications associated with the transformation of supply chains.

CASE STUDIES

Our team has worked on a number of prominent projects for organisations across Australia and internationally.

① SUPPLY CHAIN AND LOGISTICS STRATEGY

Driven by the need to support strong sales, Mercedes-Benz Australia engaged Siecap to review their network strategy for spare parts distribution to its multi brand dealer network. Through extensive client engagement and option testing, Siecap devised a strategy that would position the business to continue to provide a premium level of service while cognisant of projected growth, product development and the impact of evolving electric vehicle technology.

② INVENTORY MANAGEMENT

Siecap was to develop an inventory stocking policy for rail assets that would identify and deliver cost savings. This was achieved by developing a segmentation methodology based on business importance, usage value, frequency, item value and supplier lead times; and matching that to an associated inventory management policy. Key recommendations focussed on how to introduce items, their management within the inventory cycle and timely disposal.

③ FACILITY DESIGN

Experiencing substantial growth and the need to evolve its premium delivery model Miele Australia took the decision to undertake a two-year development strategy to develop and commission two new distribution facilities located in Sydney (24,000 sqm) and Brisbane (10,000 sqm). In support of this significant investment Siecap was engaged to test thinking and develop site operational concepts that incorporated leading edge design principles.

④ PROCUREMENT AND CONTRACTING

Thiess is the world's largest mining services provider and to support a change in business structure Siecap was engaged to support in the development and execution of the Procurement Policy, Procedure Application Guidelines and overall procurement process work flow. This included the development of the policy documentation requirements and the roll out of several hundred sourcing initiatives and associated contracts to implement the new policy agreement across all categories.

⑤ PROGRAM, PROJECT MANAGEMENT AND READINESS

Driven by the cessation of a joint venture for lubricant production the Siecap team has worked closely with our client to both establish the governance structures and execute the detailed tasks required to construct an entirely new Australia wide distribution network and operating model. This included governance activities and the establishment of new processes, policies, business rules, systems, tools, organisation structure and performance management metrics.

OUR CLIENTS

We have advised some of Australia's, and the world's leading brands and organisations in the supply chain and logistics service area.

OUR TEAM

DAVID IRVINE Chief Executive Officer
d.irvine@siecap.com.au | +61 413 544 456

David is the CEO at Siecap and has over 20 years' technical experience as a business improvement and supply chain expert. David has undertaken a number of strategic design projects focusing on optimisation and integration.
